

# Wall

Identification	
Title	WA
Abstract	
<p><b>Purpose:</b> The polylines show the locations of walls.</p> <p><b>Feature:</b> Wall. An upright structure of masonry, wood, plaster, or other building material serving to enclose, divide, or protect an area.</p> <p><b>Delineation:</b> The limit of a wall is the edge of the structure.</p> <p><b>Representation Rules:</b> Represent as a 1-dimensional object (polyline).</p> <p><b>Capture Conditions:</b> Capture walls less than or equal to 200 feet in length at ground scale. Delineate all retaining walls, walls that appear to be coincident with property boundaries and walls required for contour delineation.</p> <p><b>Capture Scale(s):</b> 1:1200</p> <p><b>Attribute Definitions:</b> (WA_CODE)</p> <p><i>NON-RETAINING WALL</i>- Delineate features proper to a domicile trailer/mobile home. Do not show trailer homes used for construction site offices, or parked in dealer sales lots. Do not collect carports or attachments unless indistinguishable.</p> <p><i>RETAINING WALL</i>- All structures consisting of dwellings, businesses, houses, garages, barns, etc. Include attached feature (e.g. covered porches, decks and attached greenhouse), by following edge of roofline. Make all near orthogonal corners square within accuracy tolerances for requested map scale. Do not show interior rooflines, such as dormers. Do not delineate separate carports, decks, patios, etc., as part of structure.</p> <p><b>Projected coordinate system:</b> NAD 1983, StatePlane Arkansas North, FIPS 0301, Feet</p> <p><b>Area Coverage:</b> County-wide (Little Rock, North Little Rock, Sherwood/Maumelle, County North, County South)</p> <p>Lat-long Range: (-92.757101 to -92.029881), (34.491824 – 35.013705)</p> <p><b>References:</b> U.S. Geological Survey, Standards for 1:24,000-Scale Digital Line Graphs and Quadrangle Maps (DLG-F), pp. 6-20 through 6-31.</p>	
Primary Capture Date	Spring 1997, 1999
In Service Date	January 2003
Status, Progress	Static
File Type	Geodatabase, delivered as shapefile
File Location	PCL geodatabase
Status, Maintenance and Update Frequency	As Needed
Spatial Data Organization Information	
Indirect Spatial Reference	None
Direct Spatial Reference Method	Vector
Metadata Reference Information	
Metadata Date	June 2008
Metadata Contact	PAGis Technical Manager

<b>Metadata Standard Name</b>	FGDC		
<b>Metadata Standard Version</b>	FGDC		
<b>Entity and Attribute Information: Polylines</b> (Attributes with an asterisk (*) are removed before delivery; double stars (**) are generated at delivery from related columns.)			
<b>Attribute Type Label</b>	<b>Attribute Type Definition</b>	<b>Attribute Domain Values</b>	<b>Attribute Description</b>
<b>OBJECTID</b>	Double(10)	Enumerated domain	Unique number, assigned by ARCMAP.
<b>WA_UNIQ</b>	Double(10)	Enumerated domain	A unique number for each polygon, used by PAgis. WA_UNIQ values are never re-used.
<b>WA_CODE</b>	Short(2)	500 (NON-RETAINING WALL) 501 (RETAINING WALL)	The code that corresponds with wa-type.
<b>WA_TYPE**</b>	Text(20)	"NON-RETAINING WALL" "RETAINING WALL"	Indicates the type of wall
<b>FUNCTION</b>	Text(20)	Free Text	Indicates the function of the wall
<b>SASC</b>	Double(10)	See appendix I	Spatial Acquisition Source Code: indicates the source of the data.
<b>AREA</b>	Double(19)	Decimal domain	The area of the polygon, measured according to the identified projection.
