

Helipad

Identification	
Title	HP
Abstract	
<p>Purpose: The polygons were captured to represent landing and take-off areas designated for helicopters.</p> <p>Feature: Helipad, a structure used for the landing and take-off of helicopters</p> <p>Delineation: The limit of the helipad is the edge of the structure.</p> <p>Representation Rules: Represent as a 2-dimensional object (polygons).</p> <p>Capture Conditions: If the helipad is not part of a runway, apron, or taxiway, then capture.</p> <p>Capture Scale(s): 1:1200</p> <p>Projected coordinate system: NAD 1983, StatePlane Arkansas North, FIPS 0301, Feet</p> <p>Area Coverage: Little Rock and North Little Rock</p> <p>References: PAgis Procedures Manual: April 10, 1991, p. III-3. U.S. Geological Survey, Standards for 1:24,000-Scale Digital Line Graphs and Quadrangle Maps (DLG-F): April 1996, p. 3-39.</p>	
Primary Capture Date	Spring 1997, 1999
In Service Date	January 2003
Status, Progress	Static
File Type	Geodatabase, delivered as shapefile
File Location	PCL geodatabase
Status, Maintenance and Update Frequency	As Needed
Spatial Data Organization Information	
Indirect Spatial Reference	HP_NAME
Direct Spatial Reference Method	Vector
Metadata Reference Information	
Metadata Date	June 2008
Metadata Contact	PAgis Technical Manager

Metadata Standard Name	FGDC		
Metadata Standard Version	FGDC		
Entity and Attribute Information: Polygons (Attributes with an asterisk (*) are removed before delivery; double stars (**) are generated at delivery from related columns.)			
Attribute Type Label	Attribute Type Definition	Attribute Domain Values	Attribute Description
OBJECTID	Double(10)	Enumerated domain	Unique number, assigned by ARCMAP.
HP_UNIQ	Double(10)	Enumerated domain	A unique number for each polygon, used by PAgis. HP_UNIQ values are never re-used.
HP_NAME	Text(99)	Free Text	The name of a Helipad.
HP_STAT_CO	Double(10)	1 (ABANDONED) 2 (DEMOLISHED) 3 (INTERPOLATED) 5 (OPERATIONAL) 7 (RUINED) 8 (UNDER CONSTRUCTION)	Indicates the code for the status of the helipad.
HP_STAT_TY	Text(20)	"ABANDONED" "DEMOLISHED" "INTERPOLATED" "OPERATIONAL" "RUINED" "UNDER CONSTRUCTION "	Indicates the status of the helipad.
SASC	Double(10)	See appendix I	Spatial Acquisition Source Code: indicates the source of the data.
AREA	Double(19)	Decimal domain	The area of the polygon, measured according to the identified projection.
LENGTH	Double(19)	Decimal domain	The length of the arc enclosing the polygon, measured according to the identified projection.
