

## Appendix J

### Exception Code Table

Identification				
<b>Title</b>	Exception Codes			
<b>Purpose</b>	The exception codes are used in SCADD to indicate reasons/conditions that would prevent an arc from having a STREETNAME and/or values in the RANGE fields.			
Entity and Attribute Information				
Exception	Definition	Name	Both Sides	Code
Accepted	No exception annotation is required.	yes	yes	1
Cemetery Road	Road within a cemetery.	perhaps	yes	2
Private Road	Road privately built and maintained.	yes	yes	3
Alley	Access to rear of properties.	no	yes	4
Unknown Name	Objects present in the SCADD coverage for which existence could be confirmed, but for which no name is publicly recorded. Examples include driveways, roads within parks or apartment complexes, etc.	no	yes	5
Ramp	Transition from one named roadway to another.	no	yes	6
Median	Arc that has addresses on one side due to traffic islands, medians and the like.	yes	no	7
Short Arc	Arcs that lay between intersections, where no addressable structure can exist	perhaps	Yes	8
Check	Arc that has an undetermined ECODE value that will be field checked	perhaps	perhaps	9
