

## Appendix D Service Area Map

This appendix graphically delineates the service areas described in Part II of the data dictionary. The service areas are delineated based on the following conditions:

Service areas are subdivisions of the total PAgis service area. Each sub area is defined by the differences in scale and number of layers in the core data set within that service area. The areas are as follows:

North Little Rock (Area 1)	1"=100', 45 layers
Little Rock (Area 2)	1"=100', 41 layers
Sherwood/Maumelle (Area 3)	1"=200', 30 layers
County South (Area 4)	1"=200', 23 layers
County North (Area 5)	1"=200', 20 layers
Non-Standard	Data and Layers non-standard scale(s).

Area 6 data will not normally be located in a library, but will be maintained, stored and distributed as a stand-alone coverage.

### PAgis Service Area Boundary Delineations
