PAgis Procedures Manual, March 8, 1991

BUILDING OUTLINE (BO)

FEATURE SPECIFICATIONS

Buildings

Delineates all structures consisting of dwellings, businesses, houses, garages, barns, etc. Include attached features (e.g. covered porches, decks, and attached greenhouses), by following the edge of the roofline. Make all near orthogonal corners square within accuracy tolerances for requested map scale. Do not show interior rooflines, such as dormers. Do not delineate separate carports, decks, patios, etc., as part of structure. Building symbology takes precedence over other symbology when features coincide.

Ruins

Delineate as ruins, structures that appear in an extreme state of decay, (e.g., significant sections of roof or walls missing). Preserved/protected historic structures may be within the study areas that are decreed as ruins.

Trailer Home

Delineate features proper to a domicile trailer/mobile homes. Do not show trailer homes used for construction site offices, or parked in dealer sales lots. Do not collect carports or attachments unless indistinguishable.

Structure Under Construction

Delineate structures in construction stage, have a defined "footprint" (e.g., concrete pad or wall defining outline) and annotate "U/C".

Storage Tank

Delineate large petroleum tanks, natural gas tanks, and large propane tanks (e.g., for distribution and/or storage usually found at public utilities, distributors, etc.) Do not delineate private tanks associated with single-family residences, staked for distribution or storage, or discarded tanks.

Residential and Commercial Buildings

This feature will be generated to contain the label points, which result from running ARC/INFO's BUILD utility.
